# AYP Preliminary Report

Review student populations. If you have a need to appeal, use the link listed below to go to the appeals site.

The goal for schools, districts, state, and nation is for all students in grades 3 through 8 and 10 to be proficient in reading and math and language by the spring of 2014. Idaho is phasing in the tests, which will measure the progress of students in meeting this goal. In 2004-05, students in grades 3 through 8, and 10 were tested using the Idaho Standards Achievement Test (ISAT). This report shows the percentage of the school's students meeting state goals for reading proficiency and the percentage of our schools' students meeting state goals for proficiency. This report shows required comparison of our school's students in the district and state. Goals missed are highlighted in red below and listed at the right. Goals highlighted in blue had the FED Flex rule applied.

To protect the privacy of individual students the following:

- >95% - The group with proficiency percentages greater than 95%
- <5% - The group with proficiency percentages less than 5%
- ^ No participation determinations are made for groups of less than 10 students. The participation rate of students in this group is included in district and state totals.
- ~ No proficiency determinations are made for groups of less than 34 students. The proficiency level of students in this group is included in district and state totals.
- \* The school has not reported any students in this group.

## Review calculations

This target was **met** because the Graduation Rate rate is at least 90% OR it is equal to or better than the previous year.

2004 Graduation Rate:	<b>63.74</b>
2003 Graduation Rate:	<b>49.76</b>

Participation Rate (2yrs ago):	95.28
Last Years Participation Rate:	97.13
This Years Participation Rate:	90.49
Average	$95.28 + 97.13 + 90.49 / 3 = \mathbf{94.3}$
Since the Average is less than <b>94.50</b> it does not make AYP

Determining Safe Harbor is a two-step process. The first step is the percent of not proficient students had to decrease 10% from 2004 to 2005. This group **met** the first step. The second step is for the group to make its corresponding third indicator goal.

2005 Below proficient value:	48.84
2004 Below Proficient Value:	60.64
Total Decrease:	$((60.64 - 48.84) / 60.64) * 100 = \mathbf{19.46\%}$
<a href="#">See Student Detail</a>	

Determining Safe Harbor is a two-step process. The first step is the percent of not proficient students had to decrease 10% from 2004 to 2005. This group **did not** make the first step through safe harbor because the total decrease is less than 10%.

2005 Below proficient value:	69.66
2004 Below Proficient Value:	64.89
Total Decrease:	$((64.89 - 69.66) / 64.89) * 100 = \mathbf{-7.35\%}$
